DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-27, drawn to a method and system for detection of an analyte, classified in class 436, subclass 172.
 - II. Claim 28, drawn to a use of a fluorescent label compound, classified in class 250, subclass 458.1.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different effects. Specifically, the method and system of Group I do not require the specific label of Group II. Furthermore, the label of group II could be used in materially different systems or methods, such as fluorescent labeling of articles of manufacture for identification, rather than analytical testing.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.

Any amendment of inventorship must be accompanied by a request under 37 5. CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
